

# TOPAZ DeNoise

## HOW TO INSTALL

**IMPORTANT:** If you have a previous version of DeNoise 4 installed you **MUST** uninstall it before continuing.

### 32-bit Photoshop and Photoshop Elements (Windows)

Important: The DeNoise4\_setup.msi installer is required for both 32-bit and 64-bit Photoshop users - all users will need to first run this installer. Only 64-bit Photoshop users need to install the DeNoise4\_x64ext.msi after installing the 32-bit installer.

#### To install Topaz DeNoise for 32-bit:

1. Close Photoshop (or your other editing program).
2. Double-click on the DeNoise4\_setup.msi file to launch the installation wizard. Please follow the on-screen commands by agreeing to the licensing terms and clicking "Next" all the way through in order to install DeNoise into the default location.
3. Open an image in Photoshop, then go to Filter -> Topaz Labs and select DeNoise 4. (If you forgot to close Photoshop before installing DeNoise you will need to restart it before you can access DeNoise 4.)

If you do not see DeNoise 4 listed in your Filter menu please close Photoshop and do the following:

- a. Open My Computer and go to C: \ Program Files \ Topaz Labs \ DeNoise 4 \ Plug-ins
- b. Copy the "tldenoise4ps.8bf" file
- c. Put the copied file into your Photoshop plug-ins folder.

You can access your Photoshop plug-ins folder here: C: \ Program Files \ Adobe \ Photoshop \ Plug-ins. If there is already a TopazDeNoise4 shortcut file in the plug-ins folder, please delete it before adding the new one.

After that, please restart Photoshop and open an image then you will be able to access Topaz DeNoise 4.

### 64-bit Photoshop CS4 (Windows)

To install Topaz DeNoise for 64-bit CS4 and 64-bit Windows XP / Vista:

1. Complete steps 1 and 2 from above.
2. Double-click on the DeNoise4\_x64ext.msi file to launch the 64-bit extension installation wizard. Please follow the on-screen commands and it will automatically install Topaz DeNoise for 64-bit Photoshop.
3. Restart Photoshop if it was open and then access DeNoise 4 from your Filter menu.

\*Your Photoshop Plug-ins folder is located here: C: \ Program Files (x86) \ Adobe \ Photoshop \ Plug-ins

If you want to use DeNoise 4 in Lightroom you will need to download Topaz Fusion Express. You can get it online at: [www.topazlabs.com/downloads](http://www.topazlabs.com/downloads). For more info please see: [www.topazlabs.com/fusion](http://www.topazlabs.com/fusion)
